TECHNICAL APPROACH

FRONTEND

Google Forms used as the user interface for collecting legal issues.

BACKEND

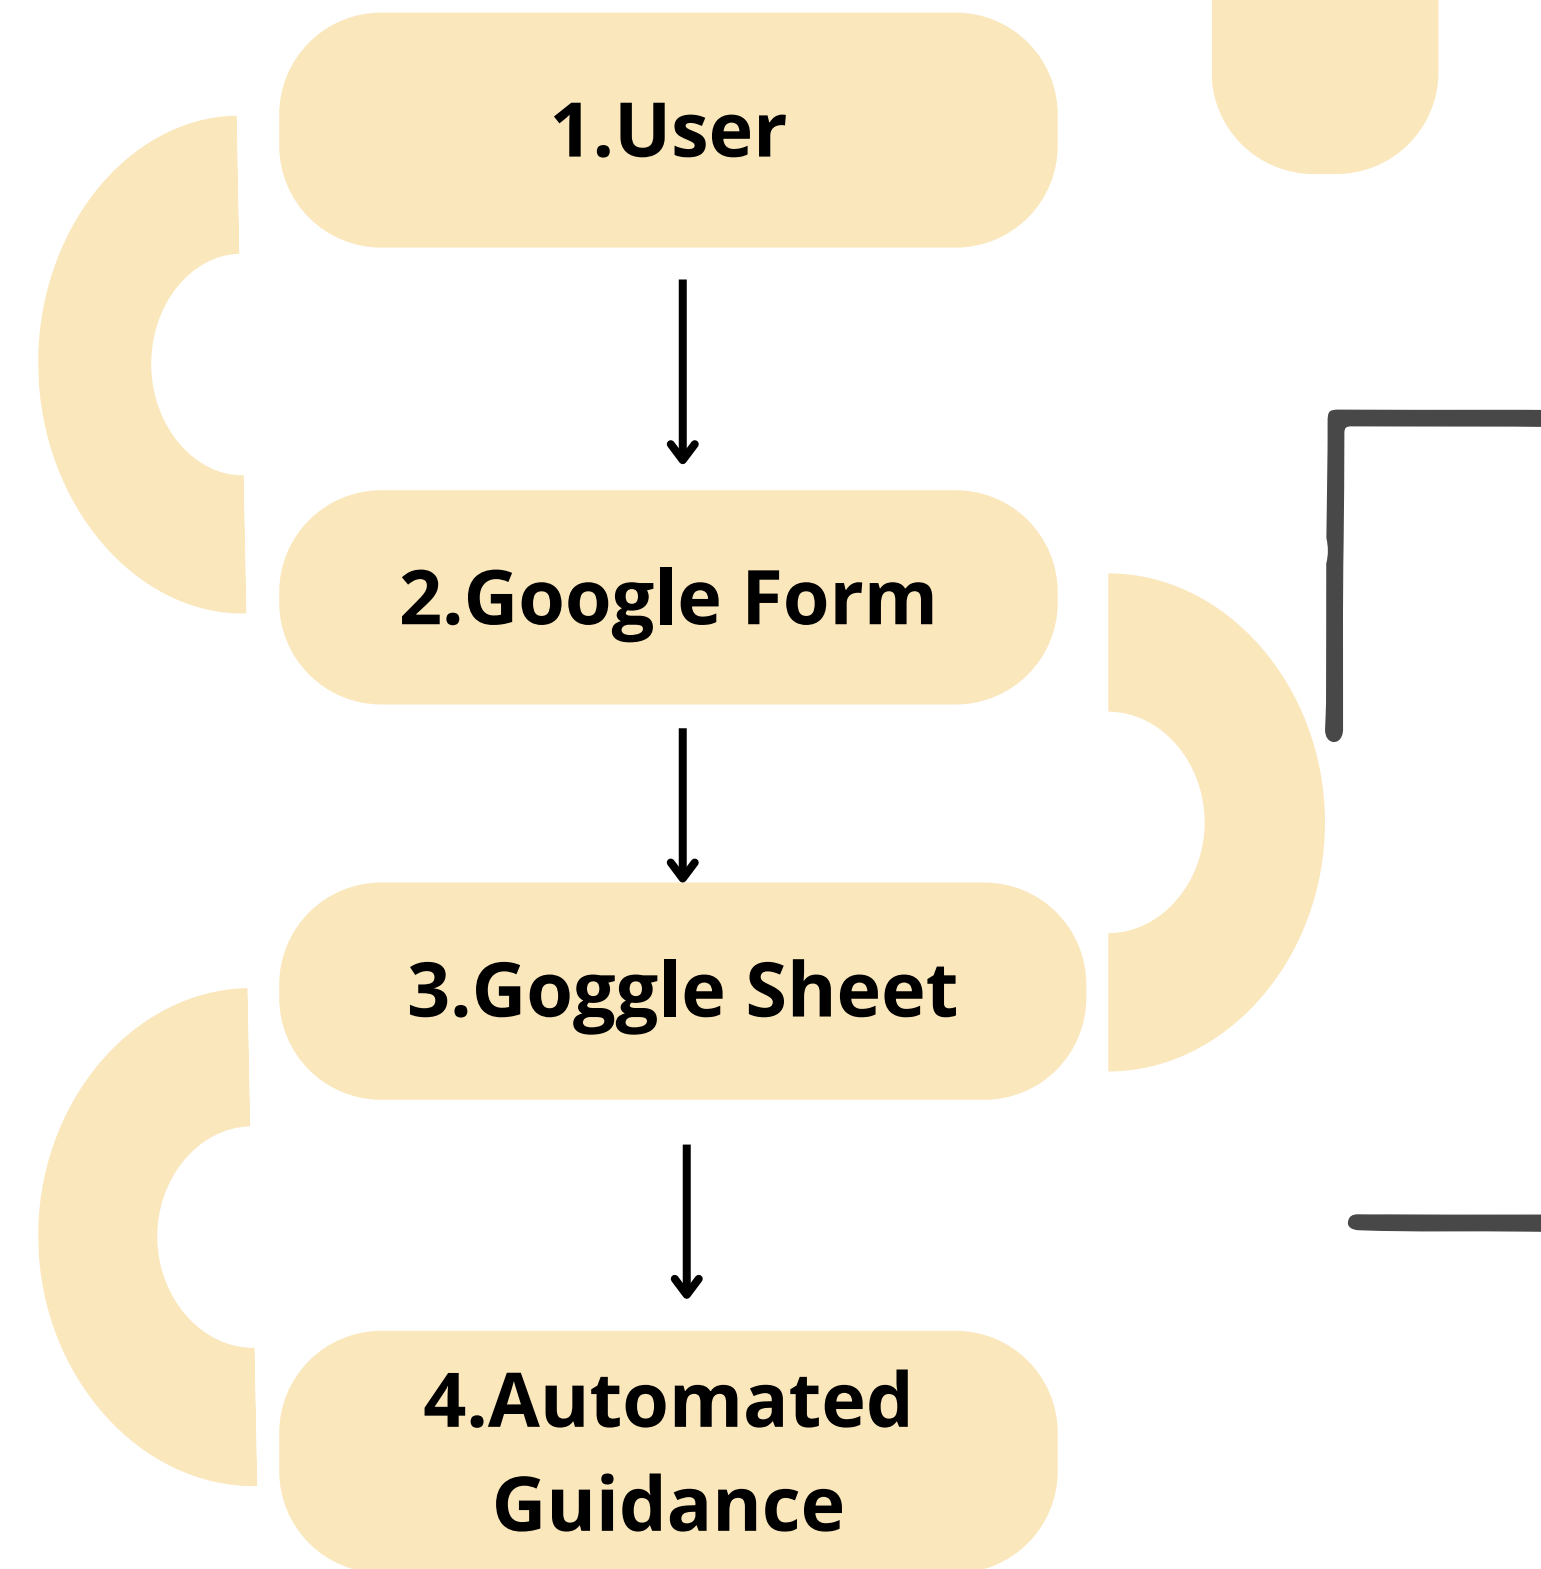

Google Sheets acts as backend database to store responses.

LOGIC / AUTOMATION

- IF-based formulas used to:
- Categorize legal issue
- Generate suggested action
- Map relevant helpline/resource

PLATFORM

Entire system built using Google tools

FEASIBILITY AND VIABILITY

FEASIBILITY OF THE IDEA:

- Uses free and easily available tools (Google Forms & Sheets).
- No technical infrastructure or coding required.
- Can be developed and deployed in one day.

POTENTIAL CHALLENGES:

- Limited to rule-based logic (not AI).
- Needs correct mapping of legal resources.
- Depends on internet access.

STRATEGIES TO OVERCOME:

- Regular update of helpline database.
- Expand rules gradually for more cases.
- Future integration with AI chatbots.
